EXP 5(a)	Reports

Aim:

To create and configure reports in Zoho Creator for displaying, sorting, grouping and filtering the hotel booking data.

Theory:

Reports display the records submitted through forms. They can be shown as list, Kanban, calendar or summary and customised using columns, sorting, grouping and filters. The Room_Booking_Report shows all booking fields grouped by Room Type and sorted by Booking ID.

Procedure:

1. Open the application and create the Room_Booking_Report for the Room Booking Form.
2. Select the columns: Booking ID, Guest Name, Phone, Email, Room, Room Type, Check-In, Check-Out, Guests, Status, Rate, Nights, Total Amount, Special Requests.
3. Sort the records by Booking ID (ascending) and group them by Room Type.
4. Use the column menu to group by Status.
5. Use Search to filter records with Status = Confirmed.
6. Verify the displayed records.

Output:

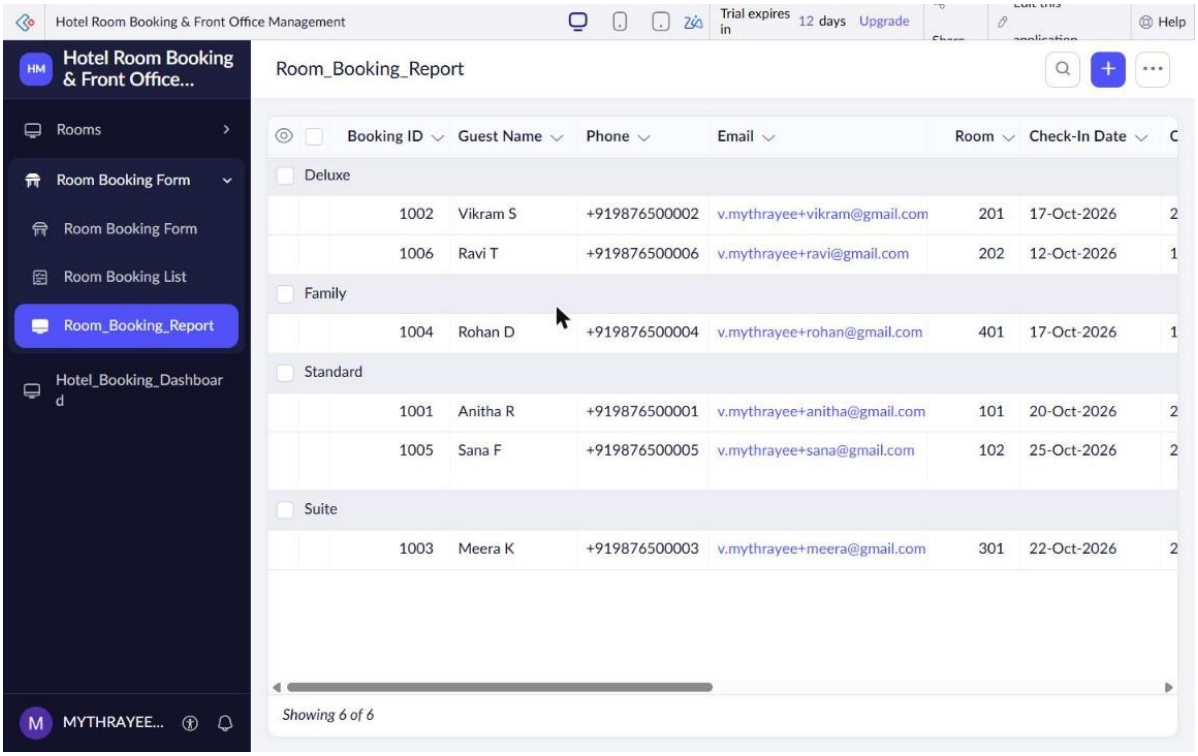

Fig. 5a.1: Room_Booking_Report grouped by Room Type

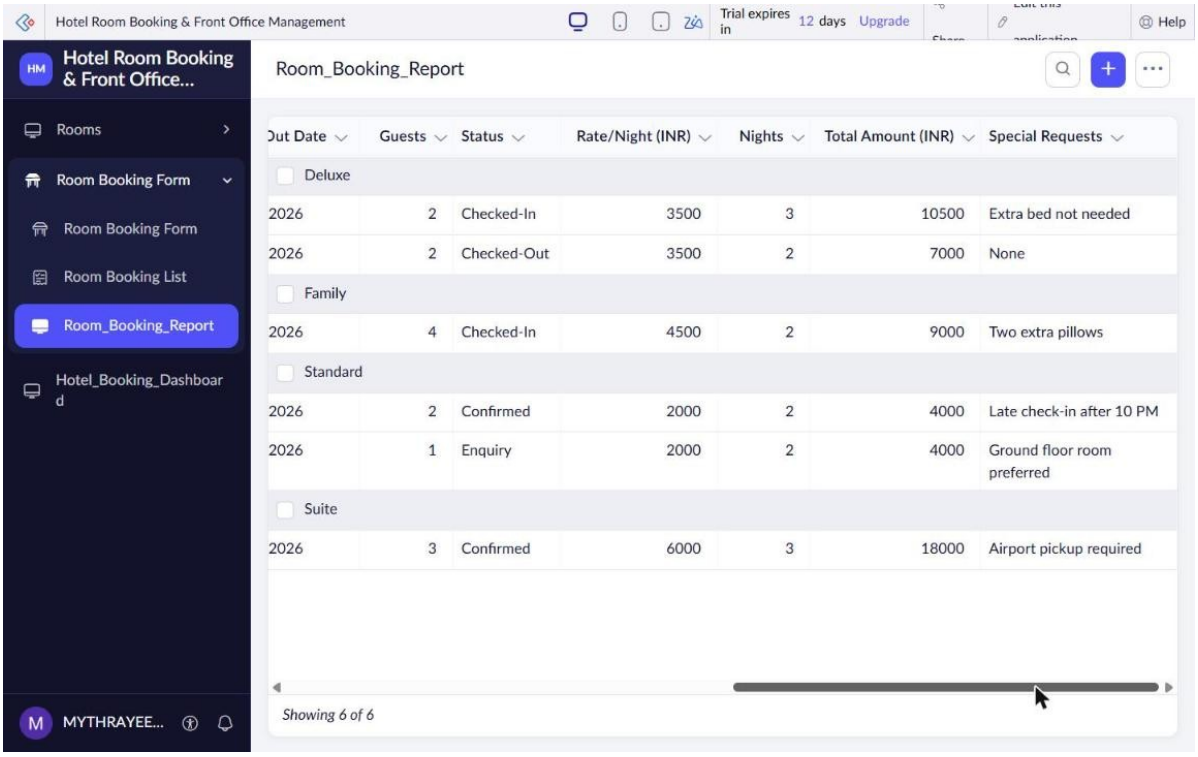

Fig. 5a.2: Report columns - Status, Rate, Nights, Total Amount

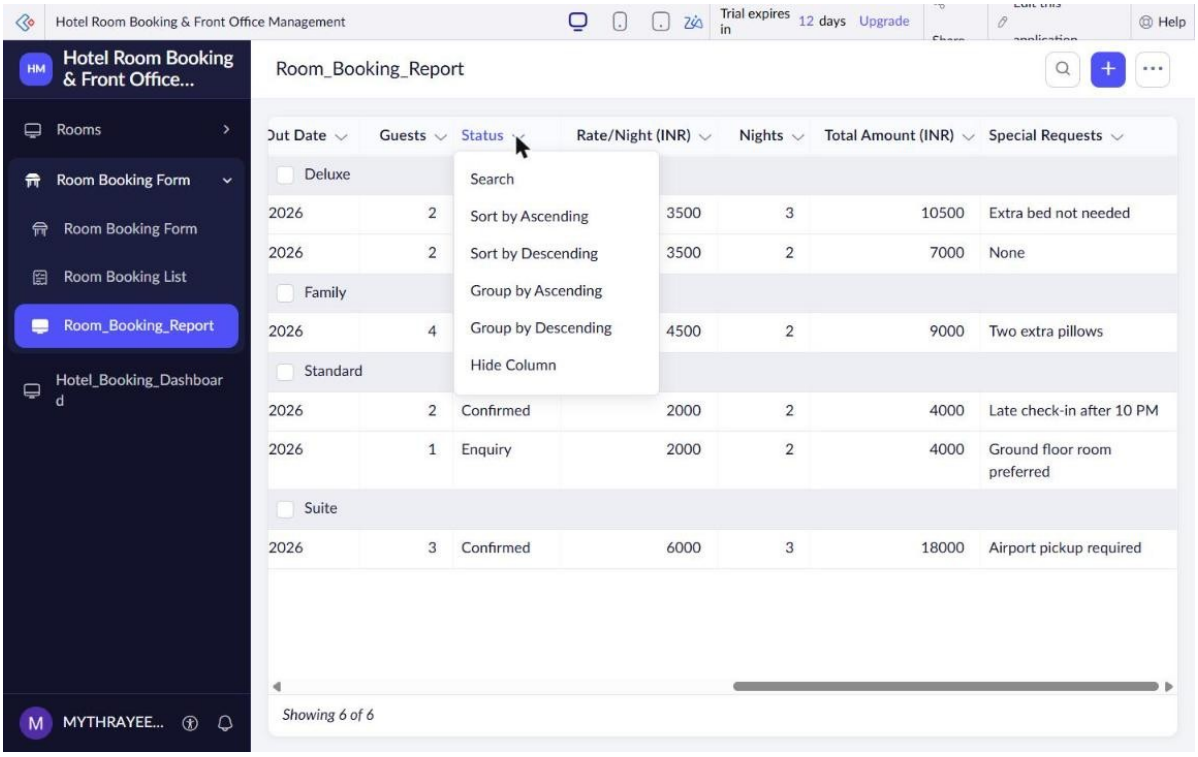

Fig. 5a.3: Sort and Group options on the Status column

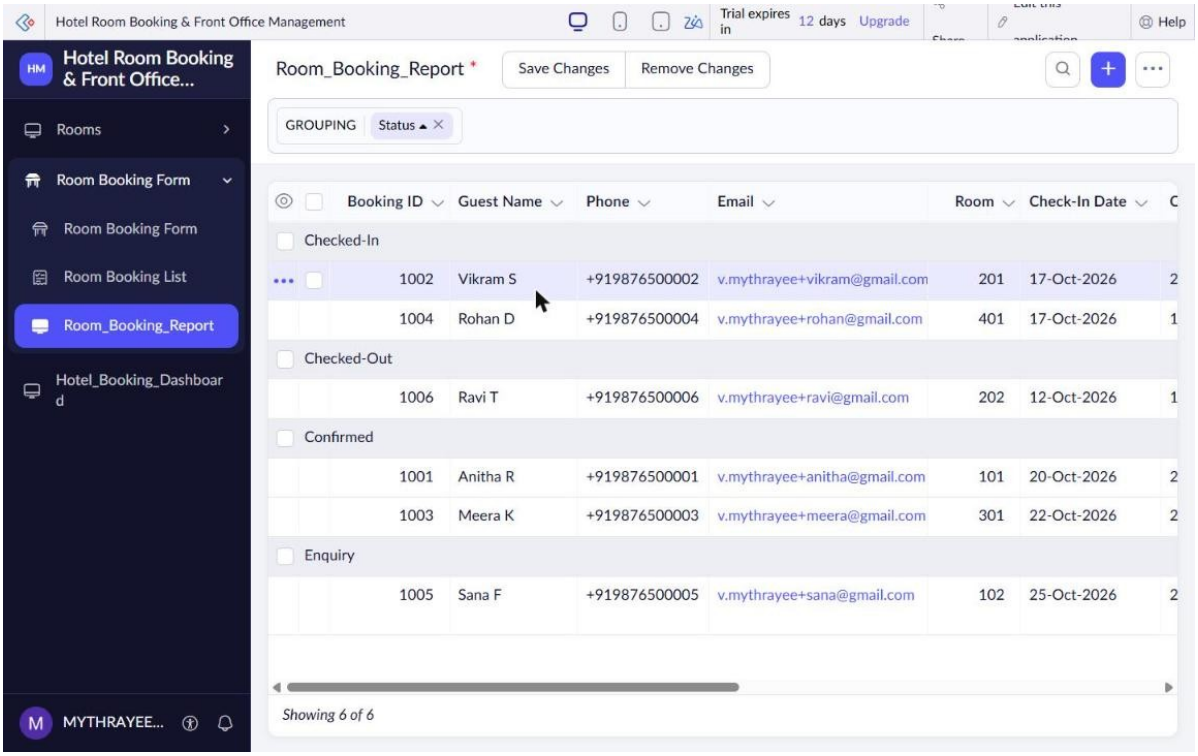

Fig. 5a.4: Records grouped by Status

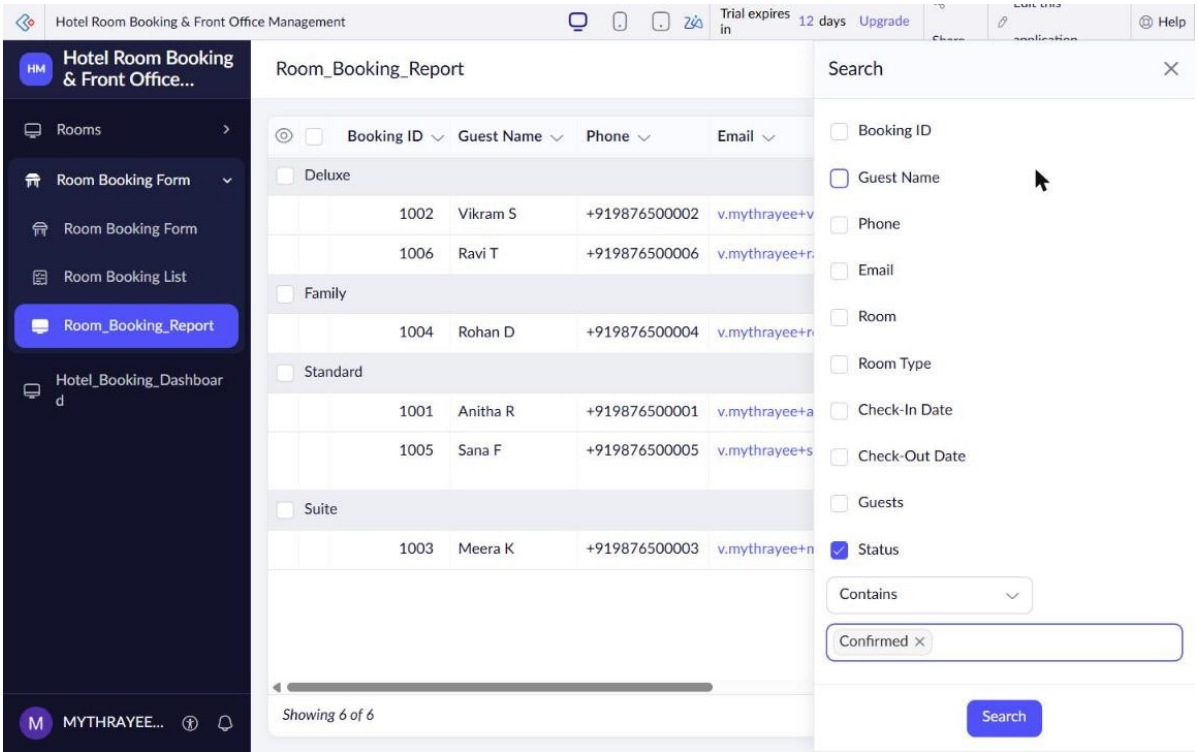

Fig. 5a.5: Applying a filter: Status = Confirmed

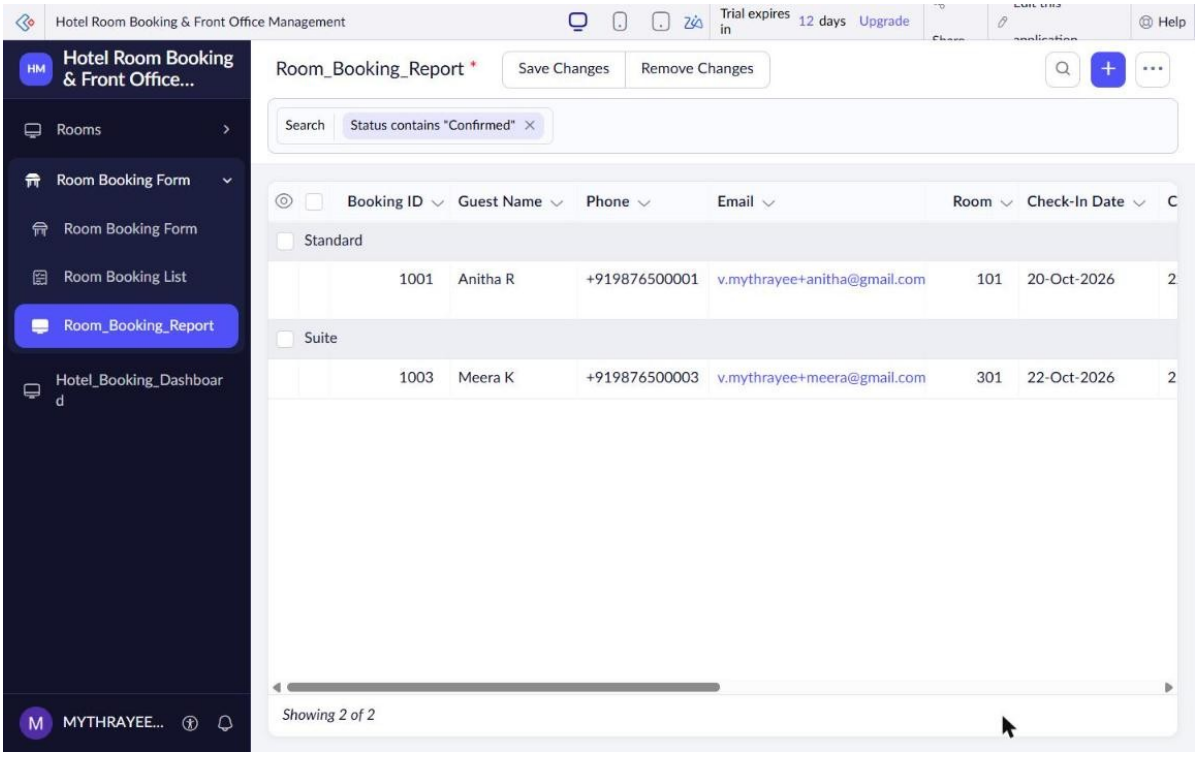

Fig. 5a.6: Filtered records (2 Confirmed bookings)

Observation:

Status	Bookings
Enquiry	1 (1005)
Confirmed	2 (1001, 1003)
Checked-In	2 (1002, 1004)
Checked-Out	1 (1006)

Result:

The Room_Booking_Report was created and the booking records were displayed with sorting, grouping and filtering, enabling easy management of hotel bookings.
